Canadian Swim Patrol

The Lifesaving Society's 3 level Canadian Swim Patrol program is for swimmers who are ready to go beyond learn-to-swim. The programs focus on developing strength and proficiency while introducing swimmers to the challenging world of lifesaving. Swimmers will have fun enhancing their capability in the water, increasing their physical conditioning, and learning lifesaving judgment. Each level will continue to develop swimmers' strokes and provide a skill foundation that will prepare them for success in the Society's Bronze Medal Awards. Each level of the Canadian Swim Patrol program has three modules: Water Proficiency, First Aid, and Recognition and Rescue.

Skating

Private Skating Lessons Ages 3+

Qualified skating instructors will teach the fundamentals of ice skating for skaters ages 3 years and up. This is a wonderful opportunity for those who are learning how to skate or are currently skating and would like to gain more confidence on the ice. Private skating lessons are also available with two skaters together per lesson if skaters are at similar skill levels. CSA approved hockey helmets are required to be worn on the ice during the lesson. Bike helmets do not provide sufficient head protection from a fall on the ice and are not permitted.

All lessons take place on the Leisure Ice surface or Holmes Arena (when available). Punch passes which hold up to five lessons are available for purchase at the Servus Sports Centre and must be presented to the instructor before each lesson. For more information or to register, please go online at Private Skating Lessons - Recreation & Culture or call 780-875-4529. Once you've signed up, your name will be added to the Waitlist. As soon as an instructor is available for the days/times indicated, you'll receive a call and email to confirm.

Please note: GST applies to skaters ages 13 years and up. We do not provide skates or hockey helmets for these lessons.

For the Parent & Child class, one parent or adult guardian is required to be on the ice with their child to provide support. Ice grips for your footwear are available for this class..

PARENT AND CHILD

This class is recommended for children with little or no skating experience and who require assistance to stand on the ice. The focus of this class will be teaching balance, posture, and learning to stand up on the ice. Ice grips for your footwear are available for this class. There is a limited supply of ice grippers available to borrow during this class. ONE parent or caregiver per child is required on the ice per class. Adults are required to wear proper footwear for safety on the ice.

LIL' SKATERS STEP 1

To participate in this class, children are required to stand and walk on the ice with little or no assistance from the instructor. It is also an independent class where skaters are to follow instructions on the ice in a group setting. If the skaters are neither holding their balance on the ice nor following instruction, then the "Parent and Child" class is highly recommended. The fundamental movements of skating are introduced in this class, including skating forward, walking backward and turning, stopping, and jumping. Various activities such as action songs, teaching aids, and games are used to ensure a fun learning environment.

LIL' SKATERS STEP 2

This class is an excellent choice for those who have already taken Lil' Skaters Step 1 or for those with previous skating experience. Further development of fundamental movements of skating is taught during this class: skate forward, skate backward, turns, stops, and jumps. Balance and edge development are also introduced. Skill circuits, teaching aids, and games are used to ensure a fun learning environment.

LIL' SKATERS STEP 3

This is a fast-paced class and is designed for those who have already taken Lil' Skaters Step 2. This class can also be taken by those who have previously taken other skating lessons and have learned the fundamental movements of skating. Skaters will be taught forward crossovers, backward stride, side stops, tight glides, and edge development. Skill circuits, teaching aids, and games are used to ensure a fun and learning environment.
