Asset Management Plan Revision Log

Date	Description
October 6, 2025	Initial Submission
October 9, 2025	Revised based on Staff Comments
October 14, 2025	Revised based on Staff Comments

This Asset Management Plan (AMP) is an output of a corporate management system which functions continuously. Information used to create the AMP is updated as work is planned, tendered and completed. Updated AMPs are issued regularly to support budget processes and infrastructure-related decisions

We look forward to helping you build a community that meets your objectives.

Nick Larson, P.Eng.

1 INTRODUCTION

1.1 Overview

This Asset Management Plan (AMP) builds a structured relationship between infrastructure spending and asset performance. Periodic updates ensure it reflects changing circumstances and actively supports infrastructure decision-making processes.

1.2 Asset Performance Overview

The definition of Asset Performance is “the ability of an asset to fulfill the organization’s objectives or requirements”.

The performance of an asset directly relates to the level of service it provides:

- An asset in the good performance category is one which is meeting the expectations of the community (i.e. providing an appropriate level of service) with none or few performance deficiencies;
- An asset in the fair performance category is one which has some or many performance deficiencies, but is still meeting the expectations of the community (i.e. providing an appropriate level of service); and,
- An asset in the poor performance category is one which is not meeting expectations (i.e. not providing an appropriate level of service) and requires spending to have it meet expectations.

The community’s asset performance expectations balance costs and affordability, and are therefore unique to each community based on its infrastructure inventory, financial status and community/corporate priorities.

1.3 Provincial Asset Management Planning Requirements

The Province of Ontario developed Regulation 588/17 under the Infrastructure for Jobs and Prosperity Act (2015). The following points summarize the timelines and requirements of O.Reg. 588/17:

- An AM policy is required to articulate specific principles and commitments that will guide decisions around when, why and how to spend money on the Municipality’s infrastructure assets. The Policy is required by July 1, 2019. The Municipality successfully adopted their AM Policy in 2019.
- By July 1, 2022 the AMP was required to establish the spending that is required to ***maintain*** current asset performance expectations for water, wastewater, stormwater, roads and bridges.
- By July 1, 2024 the AMP was required to establish the spending that is required to ***maintain*** current asset performance expectations for all asset groups.
- By July 1, 2025 the AMP was required to establish the spending that is required to ***achieve desired*** asset performance expectations, and the financial strategy to fund the required spending.

1.4 AMP Development Approach

This AMP aligns with Ontario Regulation 588/17 Asset Management Planning for Municipal Infrastructure and the international standard for infrastructure asset management (ISO 55000).

The development of this AMP leverages the Municipality's best available asset and financial information, staff input, subject matter expert professional judgement, and AM best practices to complete the following steps:

1. Develop a complete listing of infrastructure assets to be included in the AMP.
2. Assess current performance (level of service) of the assets based on existing information.
3. Prepare an asset lifecycle management strategy (i.e. spending plan) that maintains the current performance of the Municipality's infrastructure assets.
4. If current performance is not sufficient, prepare an alternative spending plan that achieves the desired performance of the infrastructure assets.
5. Establish a financial strategy to fund the spending necessary to maintain current or achieve desired asset performance objectives.

1.5 Updating the Asset Management Plan

A periodic update to the AMP ensures it reflects the latest information and responds to evolving asset performance expectations in the community. Ideally, this update occurs annually in conjunction with the Municipality's budget processes, or more frequently if required to support funding applications.

1.6 Asset Management Plan Scope

This AMP includes all of the assets owned by the Municipality.

1.7 Population Growth History

The Municipality's population has been increasing steadily over the past 15 years, as shown in Table 1. There is a noteworthy population increase from 2016 to 2021, potentially attributed to the post-COVID migration of people moving to rural communities. The population growth trends will be monitored closely to understand if this level of population increase is maintained.

Table 1: Population History

YEAR	POPULATION*
2001	3,599
2006	3,850
2011	3,744
2016	3,999
2021	4,404

**Population from Statistics Canada.*

2 OVERVIEW OF ASSET PORTFOLIO

The infrastructure portfolio has an estimated replacement value of approximately \$427 million, as shown in **Figure 1**.

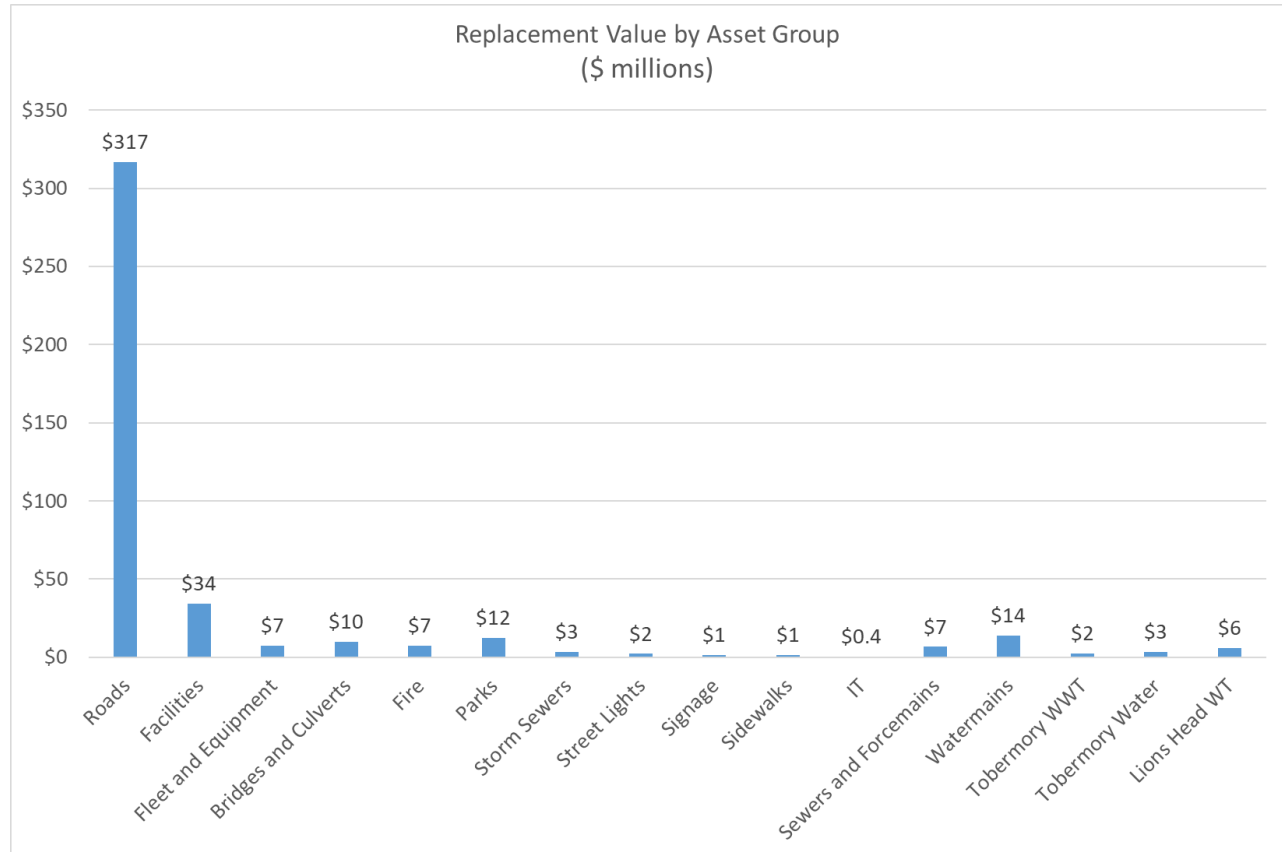

Figure 1: Infrastructure Portfolio

Note: Actual costing values are subject to market forces at the time of infrastructure construction / improvement activity, thus above values are based on historical averages and industry standards.

The following provides a summary of the assets in each group:

- Roads – 400 km of roads (164 km gravel, 236 km paved/surface treated)
- Facilities – 58 facilities and support buildings
- Bridges and Culverts – 11 culverts and 8 bridges
- Fleet – 80 vehicles or pieces of equipment
- Fire – 117 apparatus or pieces of equipment
- Parks – 90 asset records representing cemeteries, parking, parks and open spaces, marinas
- Storm Sewers – 3 km of storm sewers
- Streetlights – 228 streetlights

- Street Signs – 1,979 street signs
- Sidewalks – 6 km of sidewalks
- Information Technology – 84 IT assets
- Watermains – 11km of watermains in the Lion’s Head system
- Sanitary Sewers – 5km of sewers and forcemains servicing Tobermory
- Water Treatment – Lion’s Head Water Treatment Plant, Little Tub and the Community Centre water treatment assets
- Wastewater Treatment – 1 wastewater treatment facility and pumping station servicing Tobermory

3 ASSET PERFORMANCE ASSESSMENT

As described in **Section 1**, the new landscape of infrastructure asset management that aligns with ISO 55000 defines asset performance as the ability for an asset to fulfill its objectives or requirements. This means that the performance of an asset is proportional to the level of service it provides. Levels of service are also at the core of O.Reg. 588/17, which requires municipalities to understand the cost to achieve higher or lower levels of service.

3.1 Measuring Asset Performance

The Municipality's asset inventory contains performance information for all infrastructure assets. This includes information related to both asset condition and asset function. The performance information is collected from a variety of sources, ranging from sophisticated technologies that investigate the assets to visual observations from qualified professionals.

All asset performance data combines with the professional judgment of subject matter experts to establish the current performance of each asset as defined in **Table 2** below.

Table 2: Asset Performance Rating Descriptions

Performance Category	Description	State of Asset
Good	Asset performance meets or exceeds its objectives/requirements.	No Deficiencies
Fair	Asset performance is nearing the point where it will not meet its objectives/requirements.	Has Deficiencies
Poor	Asset performance is not meeting its objectives/requirements.	Requires Treatment (Spending)

3.2 Current Asset Performance

Figure 2 and **Table 3** provide the current performance distribution of each asset group. The total replacement cost of the assets in the poor performance category is approximately \$39 million, which represents approximately 9% of the total asset portfolio.

Note that the spending required to restore these assets to the good performance category is not equal to the replacement costs, since some assets only require rehabilitation while others require replacement with a more expensive asset.

The performance category of each asset updates on a continual basis to reflect actual spending on assets, new asset data, and changing asset performance objectives or requirements.

Appendix A provides performance metrics for each asset group. **Appendix C** indicates the performance category and performance rationale for each asset.

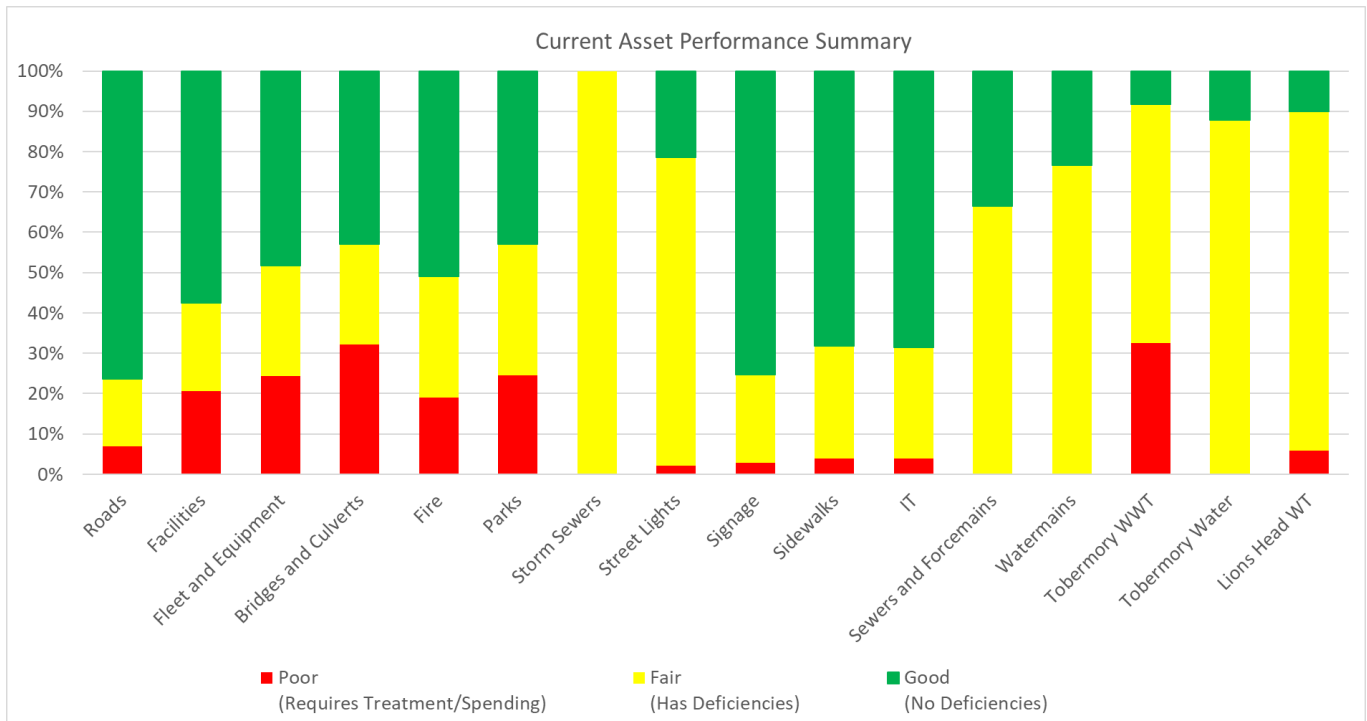

Figure 2: Current Asset Performance Distribution by Asset Group

Table 3: Current Asset Performance by Replacement Value and Asset Group

	Asset Performance Distribution by Replacement Cost			Total
	Good (No Deficiencies)	Fair (Has Deficiencies)	Poor (Requires Treatment/Spending)	
Roads	\$241,919,059	\$53,125,182	\$21,684,894	\$316,729,135
Facilities	\$19,805,801	\$7,480,910	\$7,114,206	\$34,400,917
Fleet and Equipment	\$3,471,370	\$1,974,866	\$1,753,579	\$7,199,814
Bridges and Culverts	\$4,200,000	\$2,425,000	\$3,150,000	\$9,775,000
Fire	\$3,452,759	\$2,630,254	\$1,027,352	\$7,110,365
Parks	\$5,208,188	\$3,956,990	\$2,981,089	\$12,146,266
Storm Sewers	\$0	\$3,435,021	\$0	\$3,435,021
Street Lights	\$446,699	\$1,586,236	\$45,581	\$2,078,516
Signage	\$942,527	\$275,735	\$34,839	\$1,253,102
Sidewalks	\$952,560	\$388,080	\$55,440	\$1,396,080
IT	\$261,200	\$104,700	\$15,000	\$380,900
Sewers and Forcemains	\$2,189,473	\$4,354,967	\$0	\$6,544,440
Watermains	\$3,213,750	\$10,490,000	\$0	\$13,703,750
Tobermory WWT	\$177,150	\$1,269,592	\$698,392	\$2,145,134
Tobermory Water	\$383,028	\$2,758,583	\$0	\$3,141,611
Lions Head WT	\$591,870	\$4,966,342	\$343,159	\$5,901,371
Total	\$287,215,433	\$101,222,456	\$38,903,531	\$427,341,421

4 ASSET LIFECYCLE MANAGEMENT

4.1 Asset Lifecycle Activities Overview

Table 4 provides an overview of typical asset lifecycle activities applied to public infrastructure. The spending forecasts in this section represent a combination of major maintenance, rehabilitation, and replacement treatments. **Appendix D** contains the detailed spending plan.

Table 4: Typical Asset Lifecycle Activities

Lifecycle Activity	Description
Operational	Operational activities, routine preventative maintenance, studies on asset performance
(Major) Maintenance	Repairs and component replacement to maintain asset performance, typically costing between 5-10% of asset replacement value.
Rehabilitation	Project to extend asset service life, typically costing between 15%-40% of asset replacement value.
Replacement	A project resulting in a replacement of an asset with one asset that meets top industry and community expectations.
New Asset	Construction or purchase of new assets that results in net growth of the asset inventory and an enhancement in service levels provided to the community.

4.2 Spending and Performance Forecast Approach

The analysis approach involves connecting real planned projects against specific assets where feasible and iteratively adjusting annual spending levels until the forecasted performance distribution will be relatively stable (i.e. the proportion of the asset network in the poor performance category is consistent).

For example, **Figure 3** shows a scenario where there is not sufficient spending, resulting in the proportion of assets in the poor performance category increasing from 20% in 2025 to 100% in 2045. This indicates that additional spending is required. Analysis updates continue to achieve a suitable performance forecast.

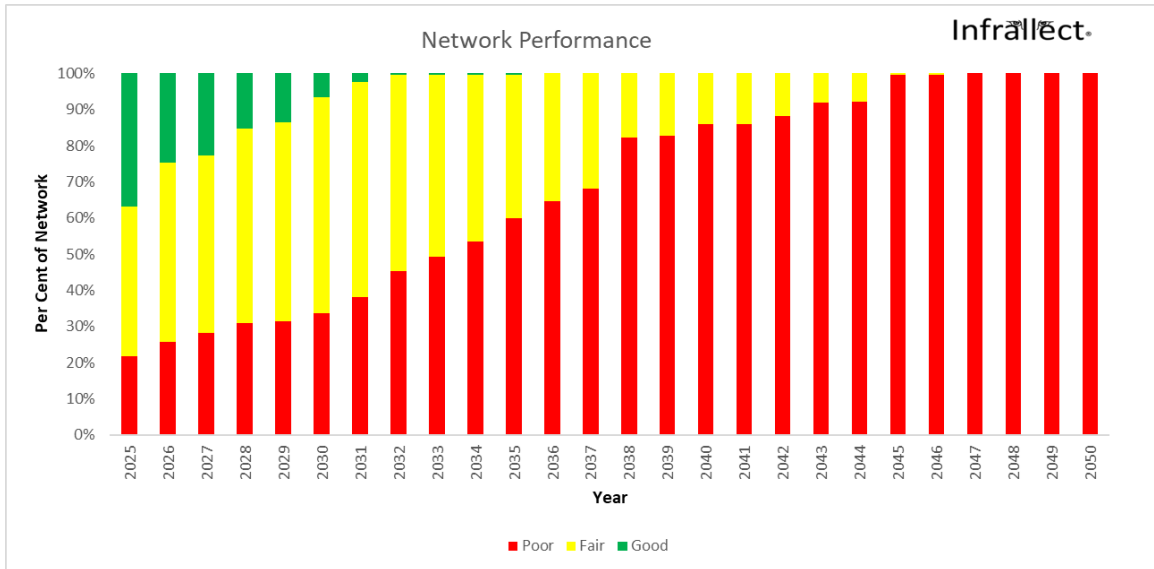

Figure 3: Sample Performance Forecast

4.3 Spending and Performance Forecast Results

4.3.1 Current versus Desired Asset Performance Expectations

As summarized in **Section 3**, the current performance of the Municipality's infrastructure systems has approximately 9% of assets in the poor performance category. The desired infrastructure performance objective in the Municipality is to have 5% or less of assets in the poor performance category by 2036 (refer to **Appendix A**), with approximately the same definitions of how poorly an asset needs to function before reaching the poor performance category.

The noteworthy increase to desired performance expectation is related to constructing a new arena in the community. The Facilities asset group forecast provides an additional forecast for this situation.

4.3.2 Individual Asset Group Results

Figure 4 to **Figure 19** provide the desired performance forecasts for each asset group and the spending required to achieve the performance forecast.

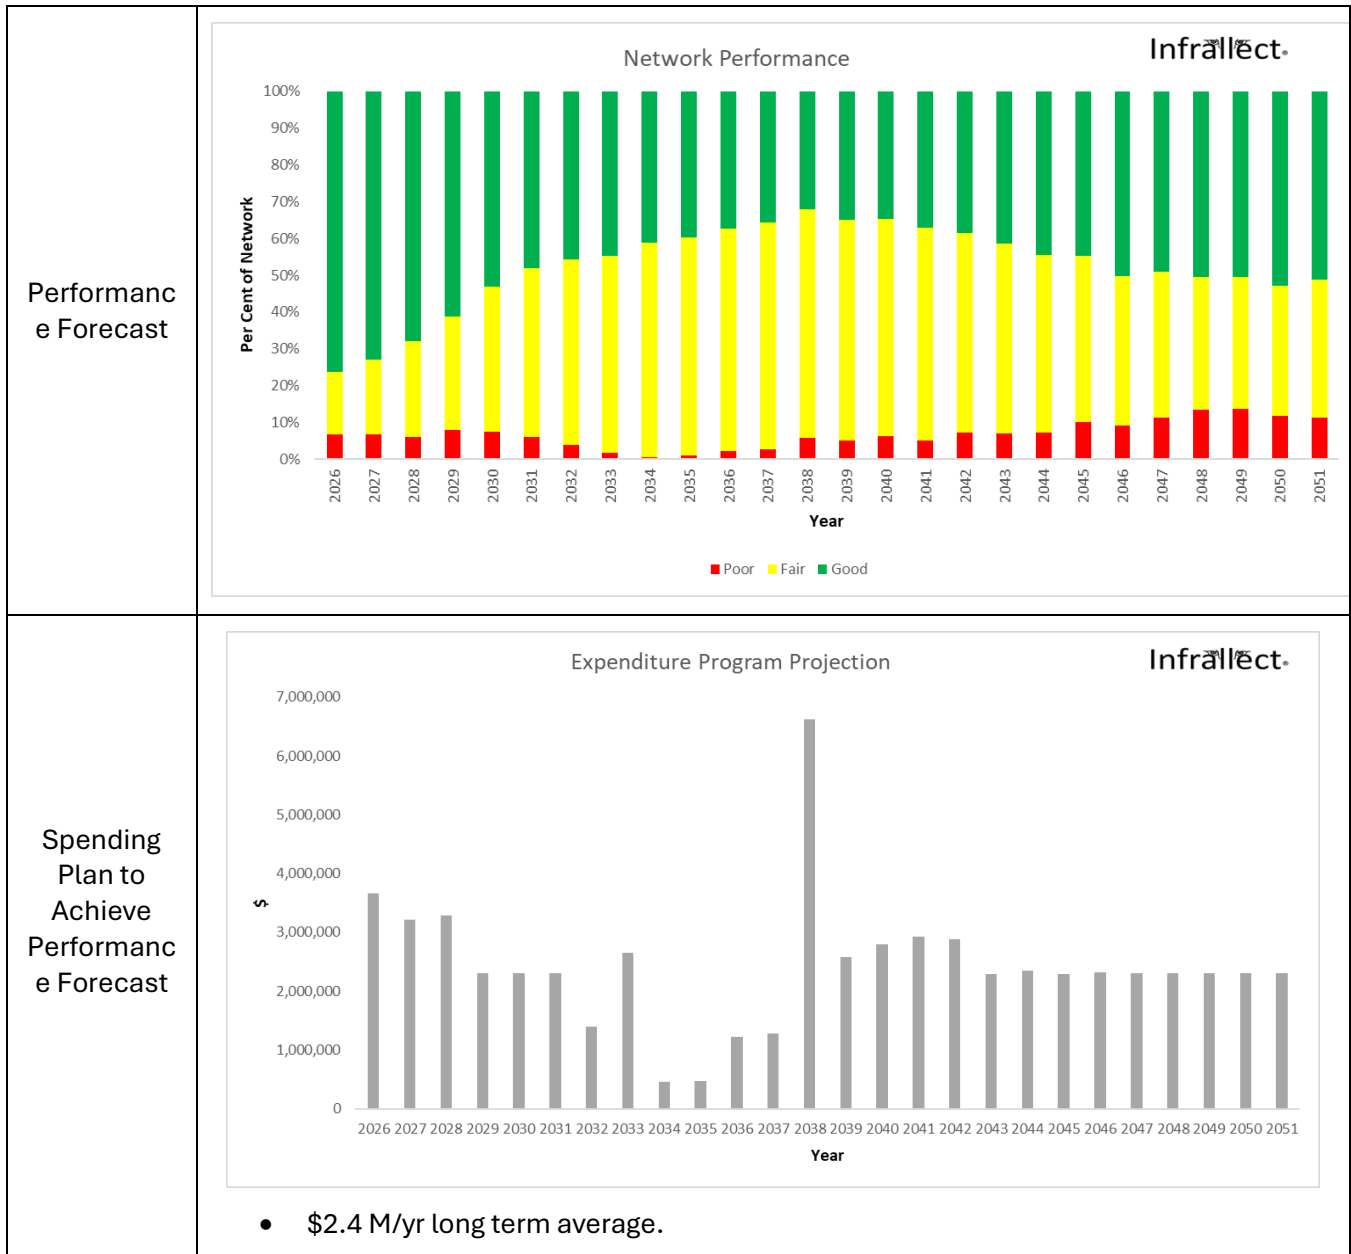

Figure 4: Roads Performance and Spending Forecast

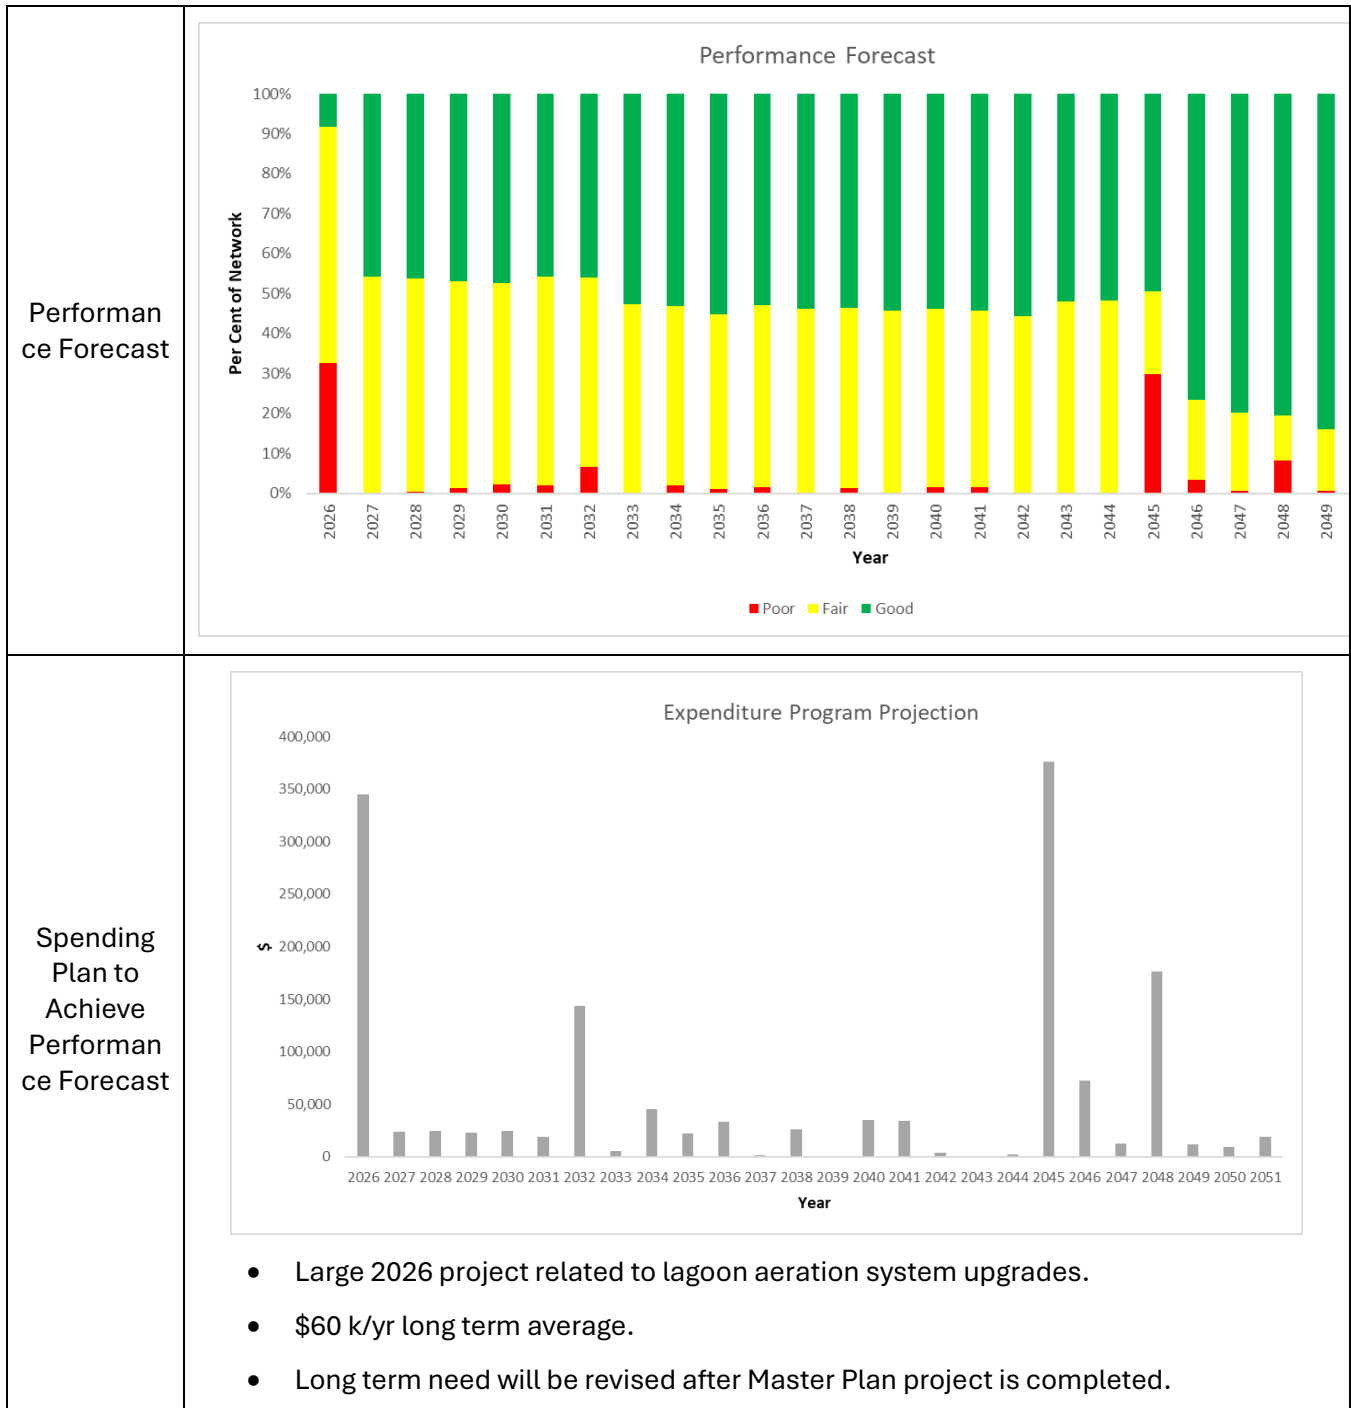

Figure 17: Tobermory WWT Performance and Spending Forecast

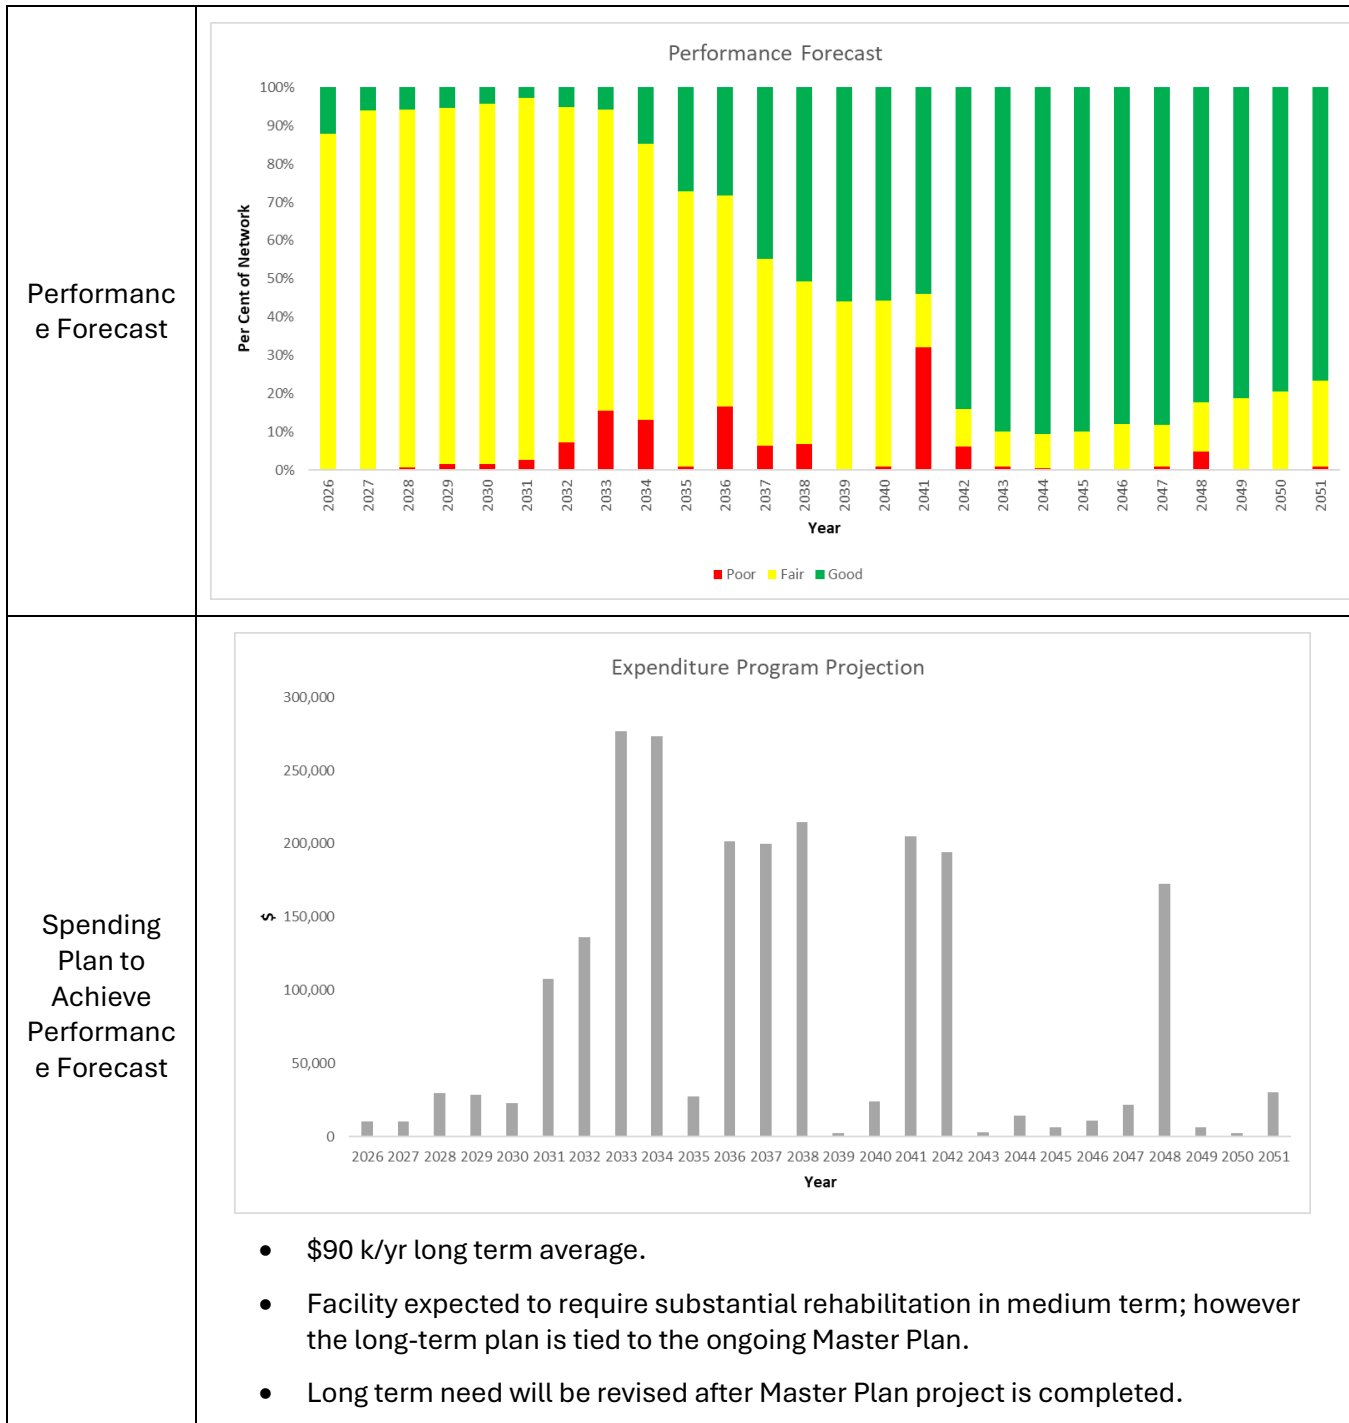

Figure 18: Tobermory Water Treatment Performance and Spending Forecast

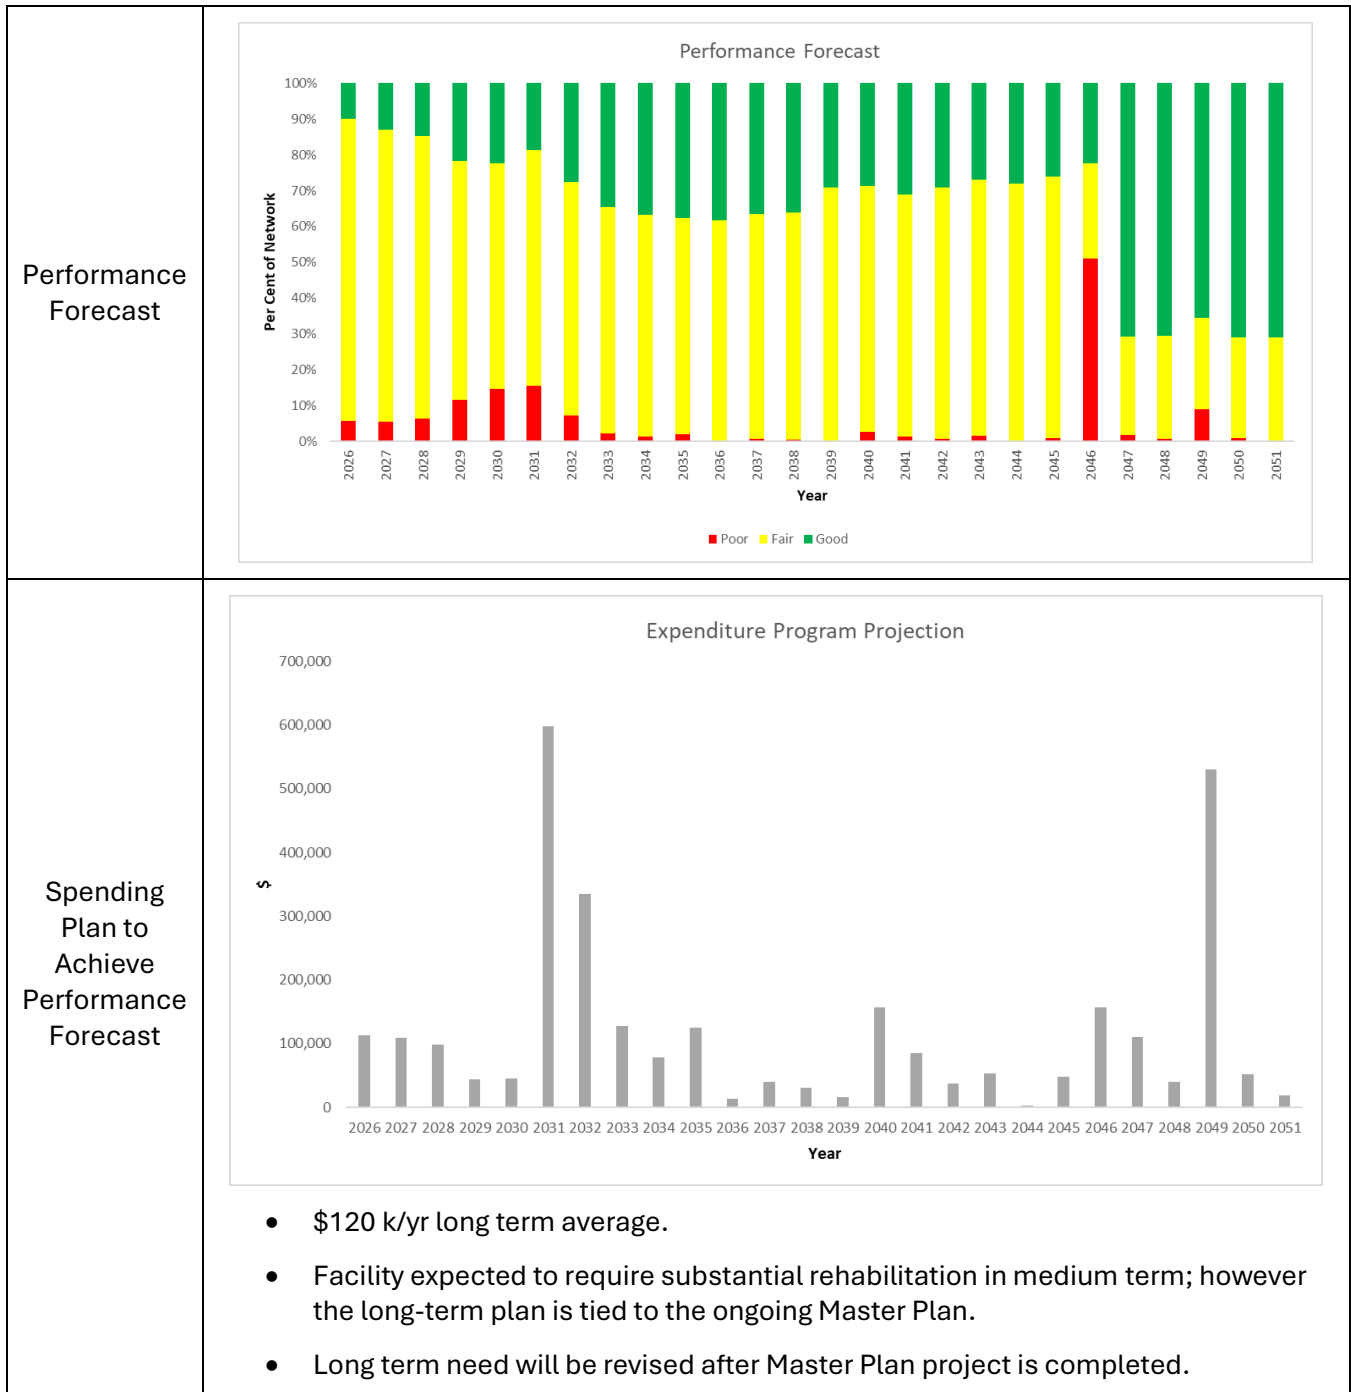

Figure 19: Lion's Head Water Treatment Performance and Spending Forecast

4.3.3 Summary Results

Figure 20 shows the combined capital spending plan to achieve desired performance expectations for all asset groups except facilities, and to maintain the current performance of the facilities asset group. An average of \$5.6 million (in 2025 \$) per year over the long term is required to achieve the Municipality's infrastructure performance expectations, excluding the new arena.

Figure 21 shows the combined capital spending plan to achieve desired performance expectations for all asset groups including facilities. An average of \$6.3 million (in 2025 \$) per year over the long term is required to achieve the Municipality's infrastructure performance expectations, including the new arena.

The current performance and performance forecasts are updated on a continual basis to reflect new information or changing organizational performance objectives or requirements.

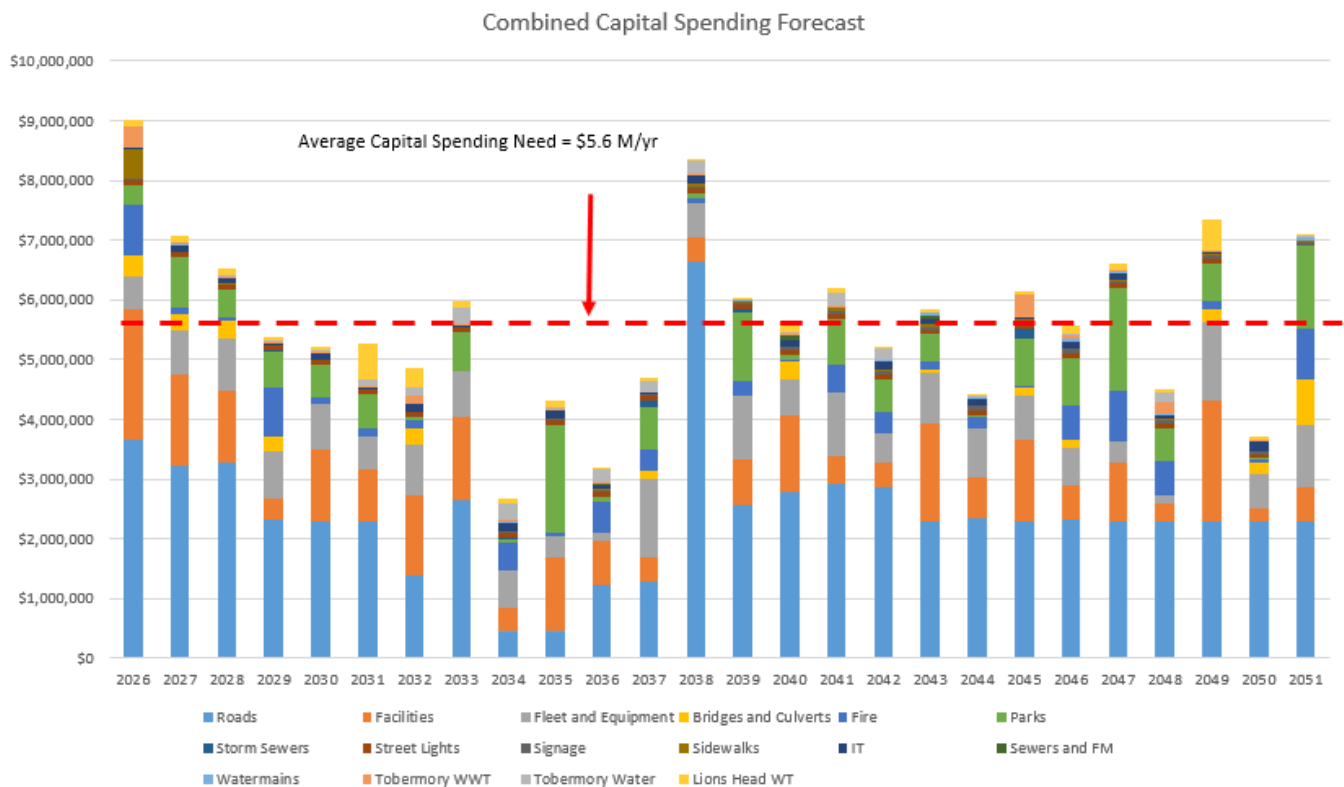

Figure 20: Combined Capital Forecast to Achieve Desired Infrastructure Performance, Except for New Arena

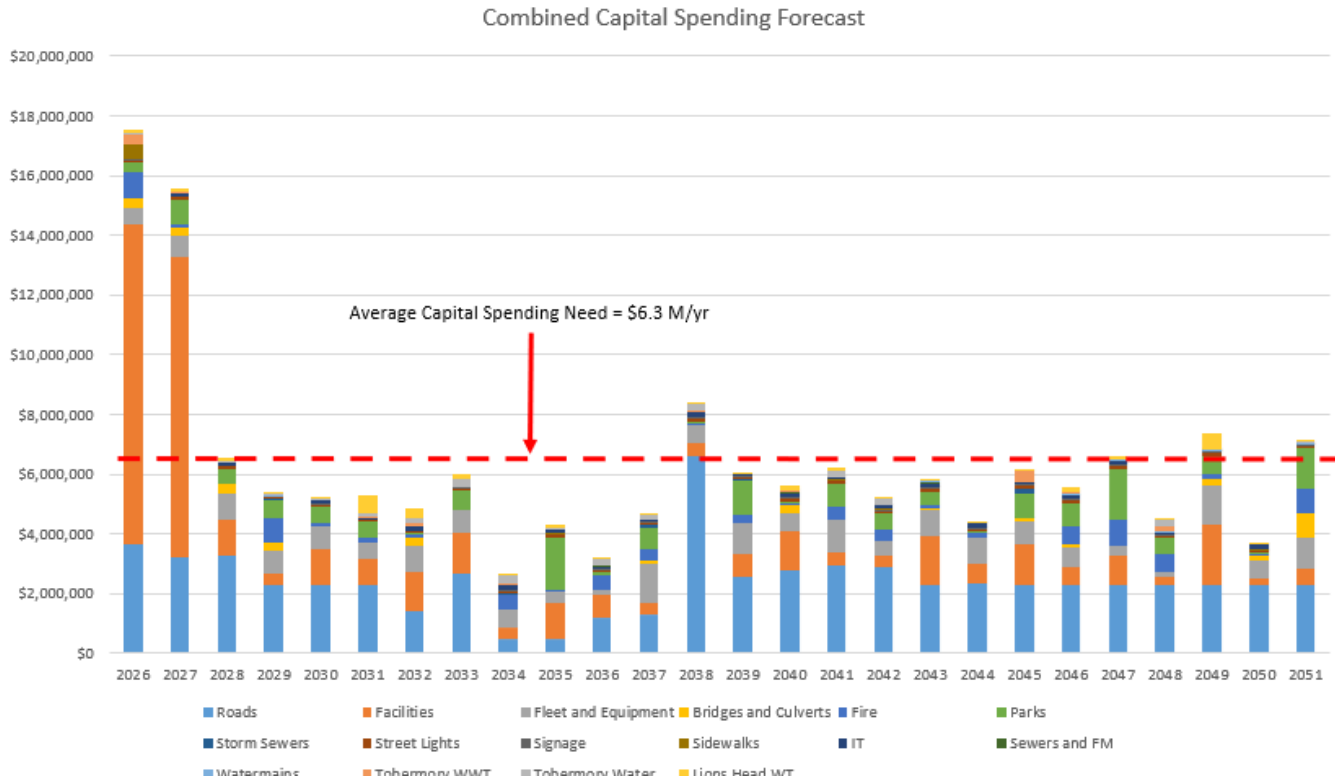

Figure 21: Combined Capital Forecast to Achieve Desired Infrastructure Performance, including New Arena

4.4 Risk Management

The approach to managing risk in this AMP is to consider the overall criticality of each asset related to the role it plays in providing services to the community (by understanding the required performance of each asset based on its location, function, size, etc.). This understanding is used to establish when an asset is not meeting its objectives or requirements based on the available technical performance indicators and subject matter expert judgement. For example, assets that are more critical have higher performance expectations, while less critical assets have lower performance expectations.

The risk management culminates into the performance score of each asset in **Appendix C** and the prioritization of the short-term spending plans in **Appendix B**.

4.5 Managing Climate Change

The expected impacts of climate change have been considered and included throughout the analysis in this AMP. This includes consideration of climate change when establishing the current performance of an asset, forecasting the performance deterioration rate of an asset, or establishing the lifecycle activities completed on an asset.

The most prominent climate impacts on the Municipality's infrastructure are severe wet weather events and forest fire risk, detailed below:

- *Climate Impact 1 - Severe Wet Weather Events*

There are some localized areas of the Municipality where roads could flood during severe wet weather or spring flood events. The Canadian Climate Atlas indicates that the number of heavy precipitation days with >20mm is expected to increase from a historical average of 5 per year to a future average of 6 per year.¹

The Municipality should continue to monitor areas of localized flooding during severe wet weather or spring flood events.

The Municipality should ask developers to consider climate change in their designs for stormwater management, which may result in larger areas for stormwater ponds or other infrastructure design changes.

- *Climate Factor 2 – Forest Fires*

The magnitude of risk increase for forest fires expected from the changing climate is uncertain. The Canadian Climate Atlas indicates that many hot weather indicators such as number of heat waves and number of days >30 degrees Celsius are expected to increase in the future, however the number of dry days is expected to remain constant.

The Municipality's forest fire risk management plan should understand the relationship between forest fire risk and relevant climate factors such as heat waves or dry days to understand the expected impacts of climate change on forest fire risk.

¹ https://climateatlas.ca/map/canada/precip20_2030_45#z=9&lat=45.43&lng=-80.56&grid=422

5 FINANCING STRATEGY

There are several options that municipalities use to finance their expenditures:

- Provincial/Federal Government specific conditional grants – one-off grants to rehabilitate existing or build new infrastructure. This is challenging for financial planning processes due to the ad-hoc nature of these programs.
- Provincial Government unconditional grants – annual grants provided by the Ontario government using a funding formula approach. This reliable funding stream allows for confident financial planning but can have certain rules around what the money can be spent on or when it must be spent by.
- Internal Financing – internal transfers from reserves to fund projects. This can have more flexibility than external debt since the Municipality can set their own repayment terms.
- Development Charges – collection funds for each new lot developed. This requires a Development Charges Background Study and a Bylaw.
- Debt – borrow money to fund large infrastructure improvement projects. This is challenging due to the limited options available, but does allow the Municipality to build more infrastructure in a shorter time period.
- User Fee Increases – increase costs paid by users of Municipality services, amenities, or facilities.
- Tax Levy – fund the spending increases through the Tax Levy.

The Municipality uses all of these options to finance the capital program except for debt.

The objective of the Municipality's financing strategy for these projects should be to maximize new assessment growth at the lowest real cost impact to tax payers (i.e. maximize net revenue growth, minimize tax levy or user fee increases). This would prioritize the following options:

1. Provincial/Federal Government Grants
2. Internal Financing using Reserves
3. Debt
4. Development Charges
5. Tax Levy/User Fee Increases

Future budgets will present the optimal balance of the available financing options to fund the Municipality's desired infrastructure program.

5.1 Long Term Financial Analysis

The financial strategy is informed by a long-term financial analysis. The financial analysis is based on the following assumptions:

- The financial analysis is based on the current accounts and approved 2025 budget.
- 2% annual inflation applied to 2025 operating and capital expenditure estimates. No net new operating expenditures are included in the analysis.

- Recurring government grant funding is assumed to continue throughout the forecast; however no escalation has been assumed to the 2025 funding levels.

Results with 2.0% Tax Increase and no New Arena (Figure 22)

- Funding all of the expenditures to achieve the desired asset performance expectations with an annual 2.0% tax levy increase results in a declining reserve balance over the long term.
- This occurs because the grant revenue, which constitutes approximately 20% of total non-levy revenue, is not indexed to inflation. Over time the expenditures (which all increase at 2.0%) rise faster than revenues despite a 2.0% increase to the tax levy.
- The Municipality may not be in a position to fund their desired infrastructure performance objectives with a 2.0% annual tax levy increase.

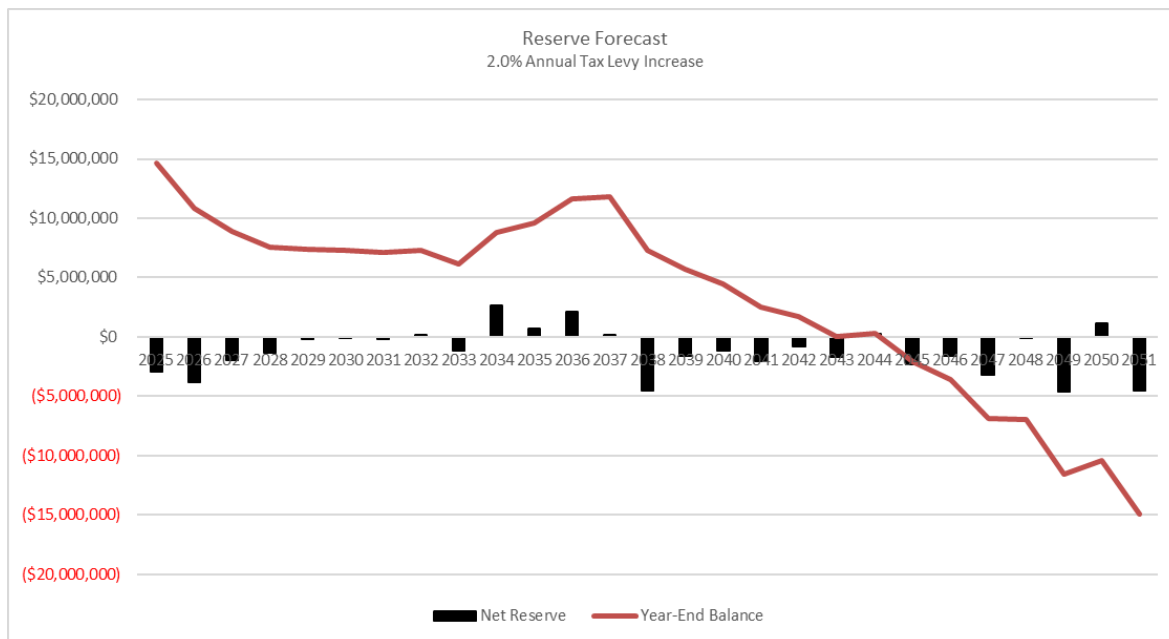

Figure 22: Reserve Forecast – 2.0% Annual Tax Increase, no New Arena

Results with 2.5% Tax Increase and no New Arena (Figure 23)

- Funding all of the expenditures to achieve the desired asset performance expectations with an annual 2.5% tax levy increase results in relatively stable reserve balance over the long term.
- The Municipality should be in a position to fund their desired infrastructure performance objectives, excluding the new arena, with a 2.5% annual tax levy increase.

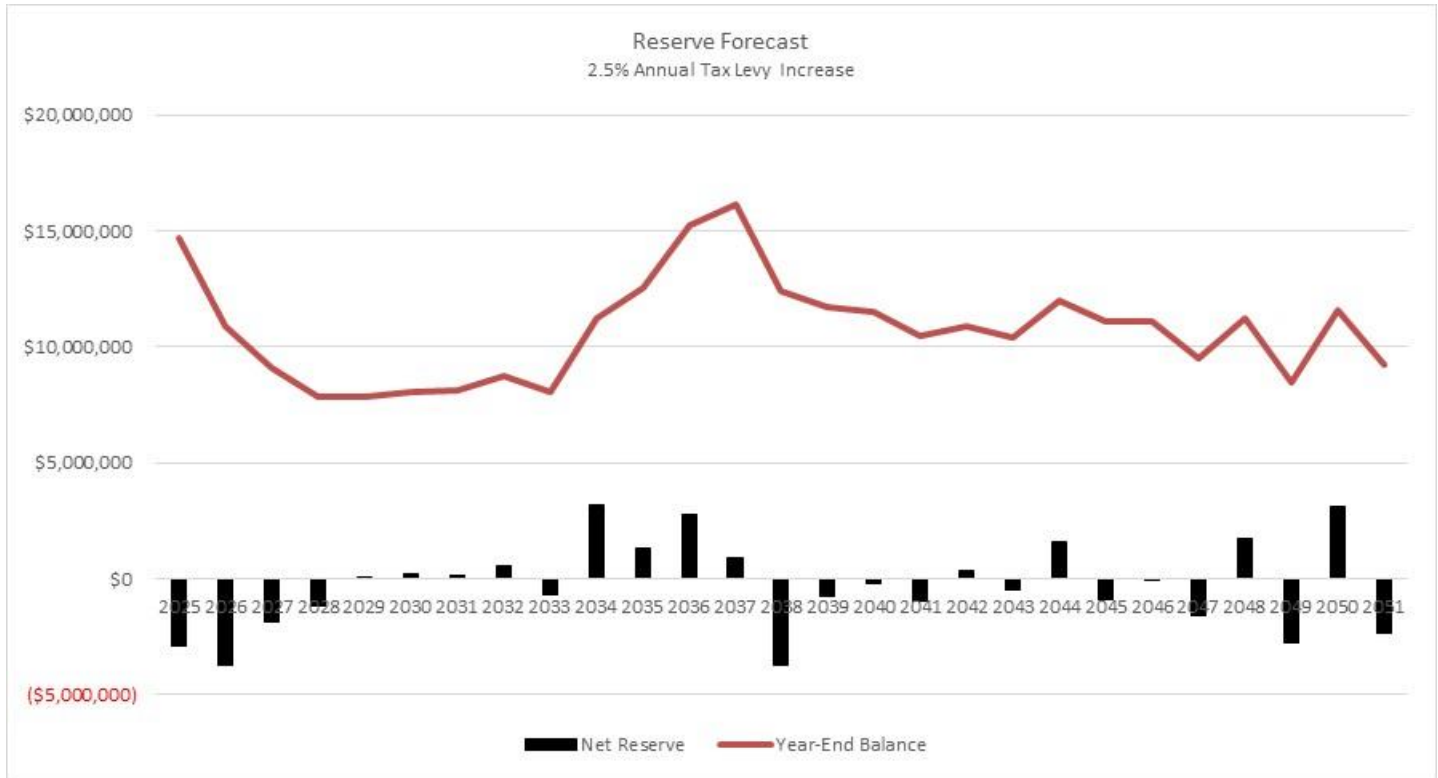

Figure 23: Reserve Forecast – 2.5% Annual Tax Increase, no New Arena

Results with 3.0% Tax Increase and New Arena (Figure 24)

- The financial strategy for the new \$20 M arena project is to obtain a grant for \$3M and to fund the remaining \$17M via debt. The debt would result in annual servicing costs of approximately \$1.4 M (20-year debenture, 5% interest rate).
- Funding all of the expenditures to achieve the desired asset performance expectations with the additional debt servicing costs to build the new arena with an annual 3.0% tax levy increase results in relatively stable reserve balance over the long term.
- The Municipality should be in a position to fund their desired infrastructure performance objectives, including the new arena, with a 3.0% annual tax levy increase.

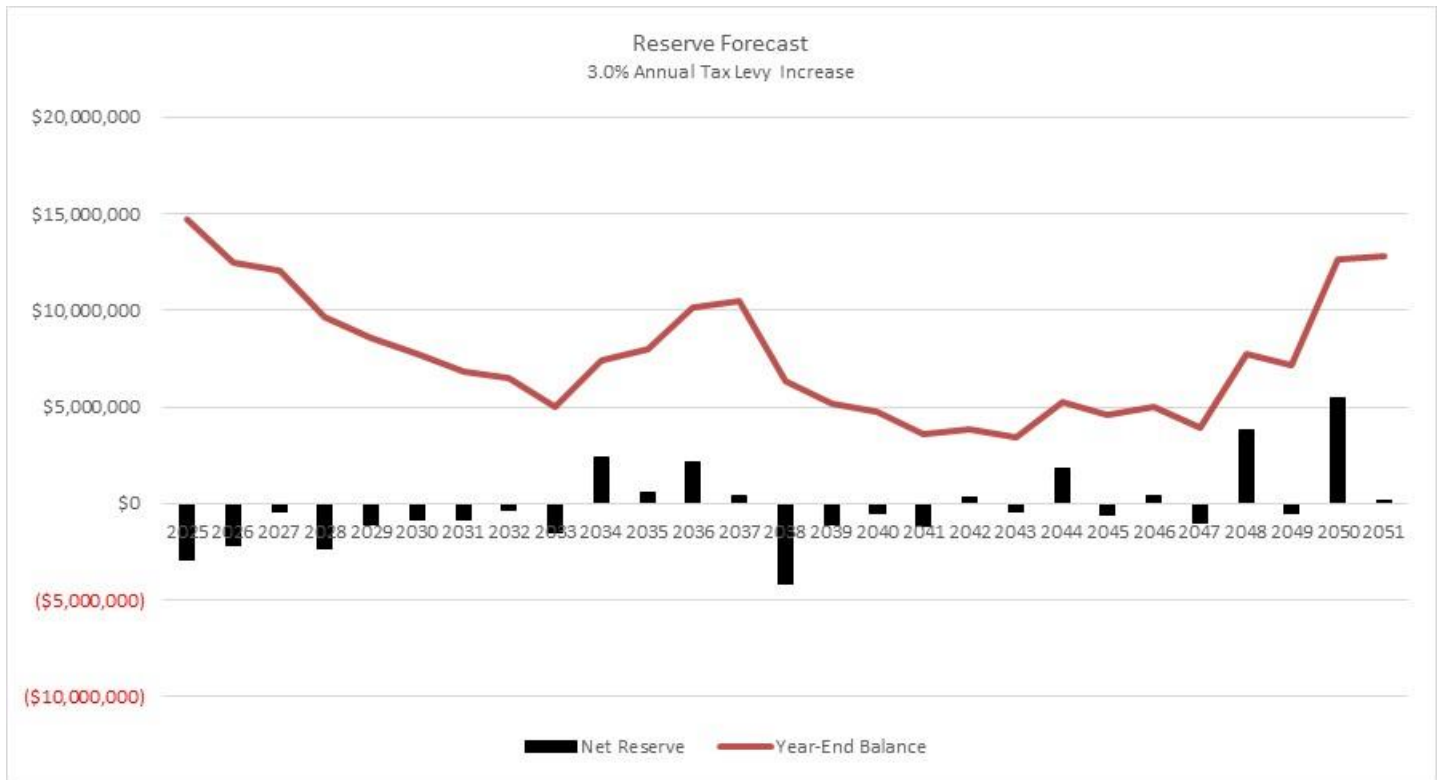

Figure 24: Reserve Forecast – 3.0% Annual Tax Increase, with New Arena

5.2 Discussion

The financial analysis demonstrates that:

- With 2.5% annual increases to the tax levy the Municipality should be able to fund the current capital program to have the infrastructure system meet the community's expectations, excluding the new arena.
- Building the new arena would require the tax levy to increase by 3.0% per year (i.e. an additional 0.5% per year).
- The real average tax bill increase for each household is less than the overall tax levy revenue increase if the number of households is increasing each year. Conversely, bills would increase more than the total tax levy annual increases if the population decreases (because the same revenue needs are being split between less households).
- The Municipality is highly dependent on recurring Provincial and Federal grants to fund its infrastructure program.
- The tax levy revenue increases could be reduced if the Municipality is successful at obtaining unconditional 'one-off' grants from the Provincial or Federal government to fund projects.

These trends will be reviewed on a continual basis as this AMP is updated.

6 DISCUSSION AND NEXT STEPS

This AMP represents the tactical output of a corporate management system. The corporate management system is the series of interconnected processes that work together to realize value from assets. This AMP uses the best available asset and financial information. The AMP is a living document that requires periodic (annual) updates to reflect new information and changing community priorities.

Moving forward, Provincial Regulation requires the Municipality to provide an annual update on the progress of the AMP. The practical steps to complete these activities are as follows:

1. Each year, update the asset inventory with the best available asset data. This adds/removes assets or updates asset information as appropriate.
2. Each year, update current asset performance ratings based on the best available information.
3. Each year, update the spending analysis to record completed spending, and to connect planned spending to assets or asset networks.
4. Each year, update the short-term plans, 25-year spending forecasts, and long-term financial analysis.

Over time, the Municipality will be able to see connections between the changing asset performance and spending levels. This will increase the value of the Municipality's AMPs each year by becoming a more useful process to support infrastructure decision making.

APPENDIX A – PERFORMANCE METRICS

Infrastructure Performance Measures

Customer Performance Measures

Overall	9%	<=5%
Asset Group	2025 - Actual % of Assets in Poor Performance	2036 - Desired % of Asset in Poor Performance
Roads	7%	<=5%
Facilities	21%	<=5%
Fleet and Equipment	24%	<=5%
Bridges and Culverts	32%	<=5%
Fire	19%	<=5%
Parks	25%	<=5%
Storm Sewers	0%	<=5%
Street Lights	2%	<=5%
Signage	3%	<=5%
Sidewalks	4%	<=5%
IT	4%	<=5%
Sewers and Force mains	0%	<=5%
Water mains	0%	<=5%
Tobermory WWT	33%	<=5%
Tobermory Water	0%	<=5%
Lions Head WT	6%	<=5%

Technical Performance Measures

Name	System Type	Indicator	2020	2021	2022	2023	2024
6781 Lion's Head WT	Water Treatment	Boil Water Advisory	0	0	0	0	0
		Adverse Water Quality Incident (AWQI)	0	1	0	0	0
		Non-Compliance	0	0	0	0	0
		Watermain Breaks	0	0	0	0	0
1132 Tobermory WW	Wastewater	Capacity (average flow/rated capacity)	31%	24%	29%	28%	24%
		Effluent (or other) Non-Compliance	1	0	0	4	2
		Bypass/Spill/Overflow events	0	0	0	0	0
		Sewer Blockages	0	0	0	0	0
		Community Complaint	0	0	0	0	0

O. Reg. 588/17 Additional Metrics			
Asset Group	Metric	Result	Comment
Roads	Road network in the municipality and its level of connectivity	Roads of various classifications exist throughout the Municipality and connect our community.	
Roads	Description of the different levels of road class pavement condition	Township has Hot Mixed Paved, Surface Treated and Gravel roads. Surface condition ranges from like-new to fully distressed.	
Roads	# of lane-kilometres of arterial roads as a proportion of square kilometres of land area of the municipality.	0	398km of roads vs Area of 784 km2, assume all local
Roads	# of lane-kilometres of collector roads and local roads as a proportion of square kilometres of land area of the municipality.	0	398km of roads vs Area of 784 km2, assume all local
Roads	# of lane-kilometres of local roads as a proportion of square kilometres of land area of the municipality	0.51	398km of roads vs Area of 784 km2, assume all local
Roads	Average pavement condition index for paved roads	76	
Roads	Average surface condition (e.g. excellent, good, fair or poor) for unpaved roads	Fair	
Stormwater Management	User groups or areas of Madawaska Valley that are protected from flooding, including the extent of the protection provided by the municipal stormwater management system	Some urban areas protected from flooding through urban ditch system or underground storm collection, some with defined outlets. Most rural areas protected from flooding through provision of municipal drains or rural ditch systems, some with defined outlets.	
Stormwater Management	Percentage of properties in municipality resilient to a 100-year storm	100%	Resilience is defined as the ability to recover to pre-event performance after an event/shock/storm occurs.
Stormwater Management	Percentage of the municipal stormwater management system resilient to a 5-year storm	100%	Resilience is defined as the ability to recover to pre-event performance after an event/shock/storm occurs.
Roads	Average Age (Years)	23	
Facilities	Average Age (Years)	38	
Fleet	Average Age (Years)	8	
Bridges and Culverts	Average Age (Years)	40	
Fire Services	Average Age (Years)	10	
Parks	Average Age (Years)	9	
Storm Sewers	Average Age (Years)	52	
Street Lights	Average Age (Years)	13	
Signage	Average Age (Years)	20	
Sidewalks	Average Age (Years)	29	
Information Technology	Average Age (Years)	3	

O. Reg. 588/17 Mandatory Metrics			
Asset Group	Metric	Result	Comment
Water	User groups or areas that are connected to the municipal water system	Most properties within the settlement of Lions Head are connected to the municipal water system.	
Water	User groups or areas that have fire flow	All properties connected to the municipal water system have some fire flow coverage.	
Water	Percentage of properties connected to the municipal water system	8%	5,101 Total Dwellings, 402 serviced parcels
Water	Percentage of properties where fire flow is available	8%	Assume all properties connected to municipal system have fire flow.
Water	Description of boil water advisories and service interruptions	No boil water advisories in 2024.	
Water	Number of connection-days per year where a boil water advisory notice is in place compared to the total number of properties connected to the municipal water system	0 connection*days, 402 serviced parcels	Assumptions: 8 hours to fix each break, 10 customers impacted. Note: Metric results in units of 'days' which is a meaningless statistic. Province needs to better define this metric.
Water	Number of connection-days per year due to water main breaks compared to the total number of properties connected to the municipal water system	0 connection*days, 402 serviced parcels	Assume Oreg metric is missing "disrupted", i.e. text should read "Number of disrupted connection-days per year due to water main breaks compared to the total number of properties connected to the municipal water system." Assumptions: 8 hours to fix each break, 10 customers impacted.
Water	Average Age of Water Treatment Assets	20 Years	
Water	Average Age of Water Distribution Assets	50 Years	
Wastewater	User groups or areas that are connected to the municipal wastewater system	Most properties within the settlement of Tobermory are connected to the municipal wastewater system.	
Wastewater	Percentage of properties connected to the municipal wastewater system	9%	5,101 Total Parcels, 450 serviced parcels
Wastewater	Description of how combined sewers in the municipal wastewater system are designed with overflow structures in place (to prevent backups into homes by allowing overflow during storm events)	N/A - no combined sewers	
Wastewater	Description of the frequency and volume of overflows in combined sewers in the municipal wastewater system that occur in habitable areas or beaches	N/A - no combined sewers	
Wastewater	Description of how stormwater can get into sanitary sewers in the municipal wastewater system, causing sewage to overflow into streets or backup into homes	Infiltration inflow into sanitary sewers in both groundwater and stormwater which are not intended to be in sanitary system. Infiltration can enter through a variety of sources (cracks in pipes, weeping tile connections, cross connection, catch basins, etc.).	
Wastewater	Description of how sanitary sewers in the municipal wastewater system are designed to be resilient to avoid sewage overflow into streets or backup into homes	Sanitary sewer systems are designed with appropriate overflows to reduce likelihood of sewer backup events. Overflows are typically found in the collection system or at pumping stations.	
Wastewater	Description of the effluent that is discharged from sewage treatment plants in the municipal wastewater system	Effluent can be defined as water pollution, such as the outflow from a sewage treatment facility. The effluent from the treatment facilities have documented compliance limits, objectives, and actual performance. The effluent criteria include effluent flow rates, and parameters for suspended solids, Biochemical Oxygen Demand (BOD), phosphorous, ammonia, and E. coli.	
Wastewater	The number of connection-days per year due to wastewater backups compared to the total number of properties connected to the municipal wastewater system.	0 backups, 450 serviced parcels	Note: Metric results in units of 'days' which is a meaningless statistic. Province needs to better define this metric.
Wastewater	Annual number of events where combined sewer flow in the municipal wastewater system exceeds system capacity compared to the total number of properties connected to the municipal wastewater system.	N/A - no combined sewers	
Wastewater	The number of effluent violations per year due to wastewater discharge compared to the total number of properties connected to the municipal wastewater system.	2 effluent violations, 450 serviced parcels	
Wastewater	Average Age of Wastewater Treatment and Pumping Assets	23 Years	
Wastewater	Average Age of Wastewater Collection Assets	37 Years	

APPENDIX B – SHORT TERM PLANS

2026 PROJECT REMINDER						
				\$7,468,875	\$5,157,000	\$3,562,000
DESCRIPTION	MANAGER	Originated with Council (C) or Staff (S) Meeting Date	Asset ID(s)	2026	2027	2028
Hidden Valley Road Bank Stabilization	Troy	S	ROAD-SE-HIDDEN-01	\$260,000		
New Roll Off Truck	Troy	S	New Asset	\$550,000		
Stokes Bay Road Improvements - Culverts (2026)	Troy	S	ROAD-EA-STOKESBAY-04	\$1,700,000		
Stokes Bay Road Improvements - Horizontal/Vertical Curve Adjustments (2027)	Troy	S	ROAD-EA-STOKESBAY-04		\$1,900,000	
Stokes Bay Road Improvements - Hot Mix Paving (2028)	Troy	S	ROAD-EA-STOKESBAY-04			\$2,100,000
Cape Chin North Road Pre Engineering	Troy	S	ROAD-LI-CAPECHINN-01, ROAD-LI-CAPECHINN-02	\$25,000		
North Shore Road Realignment	Troy	S	ROAD-EA-NORTHSH-01	\$50,000		
Tammy's Cove Road improvements	Troy	S	ROAD-LI-TAMMYS-01, ROAD-LI-TAMMYS-02	\$800,000		
Heron Point Bridge Rehabilitaion	Troy	S	BR-EA-HERONPT-06	\$300,000		
Sidewalks	Troy	S	SW-SE-CARLTON-01N and area, some new sections	\$500,000		
Municipal Office Renovations	Peggy	S	Facility Asset ID 18	\$50,000		
St Edmunds Landfill convert to transfers	Troy	S	Fleet and Equipment Asset ID 69	\$20,000		
Replace Pickup Truck	Troy	S	Fleet and Equipment Asset ID 61	\$60,000		
Copper Kettel Bridge	Troy	S	BR-EA-STOKESBAY-05	\$70,000		
Replace Sidewalk machine	Troy	S	Fleet and Equipment Asset ID 42	\$220,000		
Weed Spraying Equipemnt	Troy	S	New Asset	\$20,000		
IT Upgrades at Various Facilities	Kara	S	Various	\$65,000		
Tobermory community Center/Fire Hall Parking Lot	Troy/Mark/Jack	S	Facility Asset ID 1 and 38	\$210,000		
St. Edmunds Museum - Replace and Upgrade Storage Shed	Mark	S	Facility Asset ID 107		\$50,000	
Ferndale Info Centre - Heat Pump Installation	Mark	S	Facility Asset ID 179	\$25,000		
Lions Head Library/Fire Hall - Heat Pump Installation	Mark	S	Facility Asset ID 147 and 49	\$40,000		
Rotary Hall - Heat pumps installation	Mark	S	Facility Asset ID 56	\$25,000		

Lion's Head Beach Wash/Change Rooms	Mark	S	Parks Asset ID 43		\$250,000	
Burma Road and Stokes Bay Boat Launch Improvements	Mark	S	Parks Asset ID 67 and 72	\$50,000		
H&S - Flammables Storage Cabinets - various facilities	Mark & Troy	S	New Asset	\$20,000		
Ice Resurfacers - ordered 2025	Mark	S	Fleet and Equipment Asset ID 16	\$149,875		
Accessible washrooms - Stokes Bay CC, Rotary Hall, Friendship Club (but tied to Arena decision)	Mark	S	Facility Asset IDs: 55, 111, 175		\$50,000	
Arena - Renovation and BCA items 2026-2028 - grant funded	Mark	S	Facility Asset IDs: 8 to 14	\$1,500,000	\$1,100,000	\$1,000,000
Replace Lion's Head Harbour Pickup Truck	Mark	S	Fleet and Equipment Asset ID 9	\$75,000		
Replace Tobermory Harbour Pickup Trucks	Mark	S	Fleet and Equipment Asset ID 10		\$75,000	
Replace Parks Dump Trailer	Mark	S	Fleet and Equipment Asset ID 27	\$13,000		
Lion's Head Waterfront improvements - pathways	Mark & Peggy	S	Parks Asset ID 39		\$150,000	
Pike Bay Park Toilet Building Upgrade	Mark	S	Parks Asset ID 55		\$50,000	
LH Marina - Replace Dock D (2028)	Mark	S	Parks Asset ID 87			\$462,000
LH Marina - Replace Dock E (2027)	Mark	S	Parks Asset ID 88		\$382,000	
LH Marina - Replace Dock F (2026)	Mark	S	Parks Asset ID 89	\$261,000		
Rotary Hall - roof, siding, windows replacement	Mark & Rotary Club	S	Facility Asset ID 54	\$130,000		
Airport Runway Crack Sealing	Mark	S	Facility Asset ID 180		\$150,000	
Airport 2 additional hangars	Mark	S	New Asset		\$500,000	
Tobermory Minch Lookout	Mark	S	New Asset		\$500,000	
Tobermory - New Visitor Centre Parking/Washrooms	Mark & Troy	S	New Asset	\$280,000		
Bunker Gear Replacement	Jack	S	Fire Asset ID 46	\$30,000		
2nd Tanker Replacement	Jack	S	Fire Asset ID 5	\$800,000		
Diesel Exhaust Removal - Tobermory	Jack	S	Facility Asset ID 41	\$100,000		
Diesel Exhaust Removal - Lions Head	Jack	S	Facility Asset ID 48	\$100,000		
Tower Radio Communications Upgrades	Jack	S	Fire Asset ID 16	\$40,000		
Fire Pickup Truck Replacement	Jack	S	Fire Asset ID 8		\$90,000	

Municipality of Northern Bruce Peninsula

6-Year Recommended Capital/Major Maintenance from 2025 to 2030
The Ontario Clean Water Agency has identified the following capital projects/major maintenance for your review and approval.

Ref.									Compliance	DWQMS RA Outcome*	Health & Safety	Repair / Maintenance	Lifecycle Replacement	Improvement	Spare Parts Inventory	Approved by Client	Rationale for Project
No.	Scope of Work	2024	2025	2026	2027	2028	2029	2030									
Lion's Head Low Lift Station and Intake - 6781																	
1	Intake Video Inspection	\$3,450							M	M		M				●	165m of 300mm diameter intake pipe and intake structure. Inspection completed in 2005 showing intake is in good condition with only minor degradation of the intake area (video DVD available). Future inspection of the intake structure and intake pipe planned to take place.
2	Low Lift Pump Overhaul / Replacement			\$5,200	\$5,300							M	M				3 variable speed centrifugal pumps, 1 standby pump - 3hp up to 5.6 L/s, 2 duty pumps - 5hp up to 10 L/s
3	Chlorine Analyzer Replacement	2030+CB-C41							M	M		M	M				Replacement online analyzer as it has reached end of useful lifespan
4	Standby Power Test and genset maintenance	\$2,000	\$3,000	\$3,100	\$3,200	\$3,300	\$3,400	\$3,500	H	H		H	H				Generator to be tested to 100% capacity to determine condition and life expectancy of engine and generator.
5	Electrical System maintenance								M		M	M	M				Allowance of \$5,000 for replacement of electrical items.
6	Heating and Ventilation Upgrades											M	M				Allowance for heating and ventilation upgrades
7	Pump house Brickwork Repairs											H	H				Roof and building exterior. Generic building upgrades to fix brickwork, concrete repairs, painting etc.
8	Miscellaneous / Others	\$4,000	\$5,000	\$5,200	\$5,400	\$5,600	\$5,800	\$6,000				M	M		M		Miscellaneous repair parts
Total Estimate - Recommended Capital		\$9,450	\$8,000	\$13,500	\$13,900	\$8,900	\$9,200	\$9,500									
Lion's Head Water Treatment Plant - 6781																	
1	Chemical Pumps (Trim Chlorination)								L			L	L				Plan for purchase of new trim chlorination pump
2	Membrane Filtration Units - Cartridge Replacement	\$20,000	\$20,600	\$21,500	\$22,000	\$22,700	\$23,500	\$24,500	M	M		M	M				Purchase and install replacement filter membrane modules
3	Filter Control and Panel Inspection								M	M		M	M				Pail System review
4	Membrane Backwash System Replacement (compressed air syst)								M	M		M	M				Evaluate and replace both air compressors as they have reached end of useful lifespan
5	Replace Membrane Filtration Unit pumps											M	M				Two filter feed pumps an motors (each 10.4L/s), one for each package, associated piping and appurtenances . Evaluate and replace one as it has reached end of useful lifespan. One was replaced in 2019
6	Tyco Valves Repairs	\$4,000		\$4,200					M	M		H	H				Four major valves, air actuated valves, inter O-rings have failed in the past. Repair or replace.
7	High Lift Pumps Inspection / Overhaul / Replacement	\$50,000			\$53,000				L			L	L				Five vertical turbine high lift pumps, motors and drive - one pump rated 6.0L/s, three pumps rated 10L/s, and the last pump rated 52 L/s. Two pumps are variable speed (1 duty, 1 standby, switching continuously)
8	Standby Power Units Testing and maintenance	\$4,600	\$4,600	\$4,800	\$5,000	\$5,200	\$5,400	\$5,600	H	H		H	H				One 230kW diesel generator, fuel tank with containment
9	Electrical System maintenance											L	L				Complete inspection of all MCC components, switchgear, bus bars and cabling as well as on the Pail filter units . Bus bar issues occurred in 2007
10	System Control and Data Acquisition Upgrades		\$62,000	\$64,000					M	M		M	M				System control with data acquisition including various in-line analyzers and monitors
11	HVAC, walls, supports, doors, windows				\$10,000							M	M				Dehumidifier to be replaced . All doors require new weather stripping
12	WTP Roof Repairs																Performed in 2013
	New desktop computers for Pail and Plant SCADA	\$20,000															
13	Miscellaneous / Others	\$5,000	\$5,200	\$5,400	\$5,600	\$5,800	\$6,000	\$6,200				M	M		M		Miscellaneous repair parts
14	Pumps from Pail Skids/back wash and production		\$10,300			\$12,000											
Total Estimate - Recommended Capital		\$103,600	\$102,700	\$99,900	\$95,600	\$45,700	\$34,900	\$36,300									
Lion's Head Water Distribution System - 6781																	
1	Hydrant Installation											L	L	M			Potential for additional hydrants being required at various locations as well as additional hydrants if old water mains are replaced
2	Main Isolation Valve Replacement	\$4,000	\$4,200	\$4,400	\$4,600	\$4,800	\$5,000	\$5,200				M	M				Replace 6-inch gate valves
3	Leak detection equipment	\$25,000															
4	Underground pipe locator	\$5,000															
5	Miscellaneous / Others	\$3,000	\$3,100	\$3,200	\$3,300	\$3,400	\$3,500	\$3,600				M	M				Miscellaneous / Others repair parts
Total Estimate - Recommended Capital		\$37,000	\$7,300	\$7,600	\$7,900	\$8,200	\$8,500	\$8,800									
Tobermory Community Center - 1133																	
		\$118,000	\$121,000	\$117,400	\$62,800	\$52,600	\$54,600										
1	Miscellaneous / Others	\$1,500	\$2,000	\$2,100	\$2,200	\$2,300	\$2,400	\$2,500									
Total Estimate - Recommended Capital		\$1,500	\$2,000	\$2,100	\$2,200	\$2,300	\$2,400	\$2,500									
Tobermory Primary Place Daycare DWS - 1135																	
1	Miscellaneous / Others								M	M		M	M				Two chemical feed pumps (one duty and one standby), each capable of 1.6L/min at outlet of membrane filters, including day tank and spill containment. Existing pump requires repairs and has reached end of useful lifespan
Total Estimate - Recommended Capital		\$0	\$0	\$0	\$0	\$0	\$0	\$0									
Little Tub Water Treatment Plant - 1134																	
1	High lift pumps				\$5,600	\$5,800	\$6,000	\$6,200					M	M			Replace one high lift pump and motor as they have reached end of useful lifespan

Municipality of Northern Bruce Peninsula

6-Year Recommended Capital/Major Maintenance from 2025 to 2030
The Ontario Clean Water Agency has identified the following capital projects/major maintenance for your review and approval.

Ref.	Scope of Work								Compliance	DWQMS RA Outcome*	Health & Safety	Repair / Maintenance	Lifecycle Replacement	Improvement	Spare Parts Inventory	Approved by Client	Rationale for Project
		2024	2025	2026	2027	2028	2029	2030									
2	Soft starts				\$15,500	\$16,000	\$16,500	\$17,000					M	M			New soft starts and electrical wiring should be considered for the pumps to prevent damage to pumps when starting and stopping operation
3	Eyewash station										H						No eyewash station for health and safety reasons
4	Scada Programing and maintenance													L			Scada programming for HMI (Wonderware) and install a new work station, install communication links to Community centre and PPDC to support the IP addressing, Radio frequency connection installed to Lagoon site. Included should be a reporting package to ensure it meets and exceeds the MOE regulated reporting (this is budget price
5	Well hatches / floor													M			New well hatches, and floor rehab needed. Grating also needed to cover sump pit
6	UV unit	\$1,250	\$2,000	\$2,100	\$2,200	\$2,300	\$2,400	\$2,500	H			H	H				Annual inspection of UV units
	UV unit controller panel replacement	\$20,000															Main processing board failed in one of the controller. Repair parts unavailable.
7	WTP Plant Upgrade																Community portion to be covered should Green Municipal Fund Project Awarded
8	Other misc. maintenance	\$5,000	\$5,200	\$5,400	\$5,600	\$5,800	\$6,000	\$6,200				M	M				Miscellaneous / Others repair parts
Total Estimate - Recommended Capital		\$26,250	\$7,200	\$7,500	\$28,900	\$29,900	\$30,900	\$31,900									
Tobermory Wastewater - 1132																	
1	Sampling reduction request													H			Would allow for annual \$4,000 sampling cost reduction
2	Generator annual inspection and maintenance	\$2,000	\$5,000	\$5,200	\$5,400	\$5,600	\$5,800	\$6,000	H			H	H				Annual maintenance
3	Carbon Unit											M	M				Replacement
4	MCC (electrical system)											M	M				Inspection and preventative maintenance
5	Lagoon aeration system upgrade	\$ 50,000.00		\$217,561	moved to 2026							M	M	M			Replace (upgrade) one blower and install DO monitoring
6	Replacement of heating units											M	M				Existing units have reached end of useful lifespan
7	Lagoon cell sludge removal (approx. 1,367 m ³) and aeration piping repairs			\$150,000	moved to 2026				M			M	M				Remove approx. 1,367 m3 of sludge
8	SPS submersible pump		\$50,000						M			M	M				
9	Other misc. maintenance	\$20,000	\$20,000	\$20,000	\$20,000	\$20,000	\$20,000	\$20,000				M	M				Miscellaneous / Others repair parts
10	Sewer Camera	\$15,000															
11	Manhole repairs											M	M				
Total Estimate - Recommended Capital		\$87,000	\$75,000	\$392,761	\$25,400	\$25,600	\$25,800	\$26,000									
Total Capital Estimate		\$264,800	\$202,200	\$523,361	\$173,900	\$120,600	\$111,700	\$115,000									

* NOTE: a requirement of DWQMS v. 2.0 is to consider the outcomes of the risk assessment (RA) documented under Element 8 as part of the system's infrastructure review

Legend:

H	High priority recommended to be completed in upcoming year
M	Medium priority recommended to be completed in 1 to 3 years
L	Low priority recommended to be completed in years 4 to 5
