NOTICE

2027 Main Street South Reconstruction
(from Victoria Street to Sanders Street)

The Municipality of South Huron is planning a road reconstruction project on Main Street South from Victoria Street to Sanders Street in 2027. The project has received provincial grant funding and builds off a successful reconstruction project on Main Street in 2026.

The Municipality has retained the services of an engineering design firm (BM Ross & Associates Ltd.) and the design process is underway. The scope of the project is similar to the 2026 project where sanitary sewer, storm sewer and watermain underground infrastructure will be updated. The road, curb and sidewalk will also be replaced.

What to expect:

- You will be contacted soon by our Environmental Services Dept. regarding basement access to help inform our sanitary sewer design.
- The project will be tendered this winter.
- Individual businesses will be contacted to discuss access during construction
- A future notice will be handed out for a public meeting for residents and businesses to learn more about the project when more detail is available.
- Construction is anticipated to start April 2027 and be complete October 2027.
- Overall project sequencing and traffic control is expected to be similar to the 2026 project
