NOTICE

MUNICIPALITY OF SOUTH HURON
EXETER MAIN STREET (HIGHWAY 4) RECONSTRUCTION
(SANDERS STREET TO VICTORIA STREET)
BASEMENT SERVICING INVESTIGATIONS

The Municipality of South Huron along with assistance from the Municipal Engineering Firm (B. M. Ross and Associates Ltd - BMROSS) have initiated the planning and engineering for the reconstruction of Main Street (Highway 4) between Sanders Street and Victoria Street in Exeter. The primary scope of this project includes the full replacement of aging municipal watermains, sanitary sewers, storm sewers, and service connections, followed by complete reconstruction of the roadway and sidewalks within the project limits.

The Municipality is finalizing the design for this reconstruction project and needs to inspect existing building services within the project limits.

To confirm pipe locations, sizes, and design details, representatives will require brief access to inspect the service piping in each building's basement. To accommodate this, basement service investigations are scheduled for the week of November 16th. Further details are provided below:

- **Door-to-Door Visits:** Staff will be visiting properties door-to-door during the week of November 16th. Exact dates and times for individual properties have not been fixed.
- **Hours:** Inspections will be conducted by representatives from the Municipality and B.M. Ross and Associates (BMROSS), generally between 9:00 AM and 4:00 PM on weekdays.
- **Scheduling an Appointment:**
  - Commercial / Business Properties: Inspections will generally be completed unscheduled during normal business hours via the door-to-door visits.
  - Residential Properties: Door-to-door visits will be attempted. If someone is not typically home during standard hours—or if you prefer to set a specific time—please contact B.M. Ross at 519-524-2641 ext. 212 with your address and preferred availability.

Your co-operation with the basement investigations is greatly appreciated!
