

The Community Commons

Every dollar invested into our public library generates \$4.66 social return on investment. Your support to help us grow our space will generate a legacy for our community for years to come.

Love Your Library. Build a Legacy

St. Marys Public Library builds strong community every day. Building the Community Commons will benefit the Library by offering additional programming and meeting space for our community.

Help us make this happen. *Donate today.*

Community Commons for All

The Commons will allow the Library to grow its impact in the community and meet our strategic pillars to building strong community, offer dynamic and accessible library spaces, fun and inclusive programs and services and engaging and supportive lifelong learning.

Making a Difference

We invite visionary partners to help champion this project and help us ensure that the downtown of St. Marys offers opportunities to meet, explore, learn and connect. The space will provide opportunities for the community to be engaged and delighted and make a difference in lives every day.

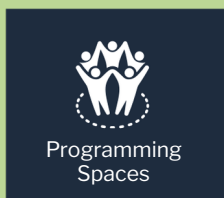

The new space will provide:

Programming Spaces: The Commons will provide the Library with much needed spaces for programming by EarlyON, The Friendship Centre and the Museum. Offering programming for all ages, the spaces will host playgroups, storytimes, films, lectures, musical performances, and community events.

MakerSpace: The Makerspace will be doubled in size and allow the community more space to engage, learn, create and be inspired with our programming and services.

Partner Spaces: A spot for community members to work closely with the Adult Learning Program of Perth, and pop ups for employment services, mental health providers, and social service agencies not currently housed permanently in St. Marys makes it easy for residents to connect.

Meeting Spaces: For meeting, casually and formally will be available.
